REPORTS TO REVIEW	Mr. Rosthenhausler, Principal Report
DISCUSSION	Principal’s Report – Site Council Mine is rather brief, it’s great to see everyone here. The kids have been great, besides their little egg thing. They are smashing eggs into each other’s head. They graduated into putting flour into the cascaron

and it's leaving flour everywhere. We are having students clean up the mess. They cleaned the cafeteria today after this took place. Other than this, students have been great for the past three months. If anything is going well, it's the students.

Graduation: there is going to be a change, this is for all these parents. I need some ideas on how to get the message. For as long as I've been here the parents have been allowed onto the field. This year will be different because of our new tuff field. We have a warranty on the filed therefore, you're not allowed to come onto the field like in the past. This is going to be a massive change from the past to the present. The first year is the hard one, after this it usually goes smoothly. With this said we're going to come up with a creative plan so that people don't clog the exit of graduation. This year's plan is to escort the kids in and escort the kids out after the ceremony. The students will be getting their diplomas at assigned places. The student will know ahead of time where that's at. So, if parents want to take pictures with their kids they can do so at that location. This will happen in the gym and other places. This is going to be a massive change!

We are working on some changes at site council, and I think we're going to talk about that later tonight. I met Ben, Mrs. Saldana Buckner about two weeks back, so we like the changes looking forward. I'm confident the outcome is going to be the same. We're trying to get more interesting site council, I'm excited about the change and as always, we'll adjust accordingly if things are not working for students, parents, and staff.

Last, I hope we have a smooth end to the school year. The others are going to talk about their area. Specifically testing and graduation, but it's been smooth in terms of the students. That's all I have.

Questions for Mr. R? Mr. Obregon is asking and suggesting that the last time at graduation in this format they needed lighting. Mr. R., right now we think everything will be inside the gym. We are going to need lighting because I believe there is going to be a spill out in that area. We are looking into that right now.

Is the graduation going to be in the gym? Graduation is going to be on the football field. The diplomas will take place after in the gym. We are trying to finalize the locations, but they will be in the gyms and cafeteria. This model is used by most school districts; we were one of the only schools still allowing the parents onto the football field.

Everything is going to be the same except the ending. They are going to exit the field as they come in. From there they will go to the

	designated area by know corresponds. If there is any major change everyone will be notified.
